Sex, Science and Survival | Ponirevo
BACKGROUND. The social environment shapes human health, producing strong relationships between social factors, disease risk, and survival. The strength of these links has drawn attention from researchers in both the social and natural sciences, who share common interests in the biological processes that link the social environment to disease outcomes and mortality risk.

Science And Survival
However, the application of 3rd Century science's ethical logic concerning the cancer-free geometrical evolution of seashell growth and development through space-time is now in violation of prevailing human death cult logic. The seashell survival blueprint was acceptable but the human one remains an emotional religious and scientific heresy.

Science And Survival
Science of Survival was the follow-up to Hubbard's best-selling Dianetics: The Modern Science of Mental Health. It expanded significantly on Dianetics , setting out what Hubbard called the "dynamics of behaviour" and provided descriptions of new techniques of Dianetics processing that Hubbard described as being faster and simpler than those that he had advanced previously.
