program for schools and individual families. References to complexity and mode refer to the overall difficulty of the problems as they appear in the main program. In the main program, all problems are automatically ...

LESSON Homework and Practice Scientific Notation

So, the answer would be 20×10^4 , except that is not in proper scientific notation. Because 20 is too large, we know we can write it as 2×10^1 . So, you can 1) either just add to the power exponent 4 ($=10^4+1=10^5$) or 2) Think of the answer as 2×10^1 multiplied by 10^4 , which is 2×10^5 .

Math 8 and Math 7/8 | Mrs. Maher - Cobb Learning

Instead, scientific notation allows us to multiply (5×10^7) times (3×10^6) . You multiply the 5 and the 3 to get 15, and then add the exponents. The answer is (15×10^{13}) . However, in order for scientific notation to be completely correct, the number at the beginning must be between 1 and 10.
