In physics, spacetime is any mathematical model which fuses the three dimensions of space and the one dimension of time into a single four-dimensional manifold. Spacetime diagrams can be used to visualize relativistic effects, such as why different observers perceive differently where and when events occur.. Until the 20th century, it was assumed that the three-dimensional geometry of the ...

Volgens de algemene relativiteitstheorie is een zwart gat een gebied in de astronomische ruimte waaruit niets – geen deeltjes en zelfs geen licht – kan ontsnappen. Dit is het gevolg van een extreme vervorming van de ruimtetijd die hier optreedt, door de zwaartekracht van een zeer compacte enorme massa.. Rndom een zwart gat is er een denkbeeldig oppervlak dat als grens fungeert, de ...
