### Shooting Star - The RuneScape Wiki

Shooting stars look like stars that quickly shoot across the sky, but they are not stars. A shooting star is really a small piece of rock or dust that hits Earth's atmosphere from space. It moves so fast that it heats up and glows as it moves through the atmosphere. Shooting stars are actually what astronomers call meteors.

Wait for a shooting star. Press A to make a wish. Repeat. And just like that, you've lit up the stars shooting across the sky. You can keep doing this until 4 AM when the shower will end. Don't get discouraged if it seems like the shooting stars have stopped sooner than that. They tend to come in waves, with lulls in between.

Shooting Stars

A shooting star, known formally as a meteor, is the visible passage of a glowing meteoroid, micrometeoroid, comet or asteroid through Earth's atmosphere, after being heated to incandescence by collisions with air molecules in the upper atmosphere, creating a streak of light via rapid motion and sometimes via shedding glowing material in its wake. The visible streak of light is what gives a ...
