map the seafloor, a multibeam sonar sends out multiple, simultaneous sonar beams (or sound waves) at once in a fan-shaped pattern. This covers the space both directly under the ship and out to each side. Multibeam collects two types of data: seafloor depth and backscatter.

Exploration Tools: Multibeam Sonar: NOAA Office of Ocean ...
The TotalScan™ marries up Broadband Sonar, CHIRP Sonar, StructureScan® HD and DownScan™ Imaging technology into one easy to use package. This makes it possible to target fish and search for fish-holding structures with the same transducer. TotalScan™ gets rid of the need for multiple transducer installs.
