SOA Governance in Action : REST and WS-* ARCHITECTURES ...

Service-oriented architecture (SOA) is a style of software design where services are
provided to the other components by application components, through a
communication protocol over a network. A SOA service is a discrete unit of
functionality that can be accessed remotely and acted upon and updated independently,
such as retrieving a credit card statement online.

SOA and SOA Governance Training Course - NobleProg

SOA Governance. In modern enterprises, Service-Oriented Architecture (SOA) should properly "steer" its enterprise IT system. This process is called "SOA Governance". Governance is derived from the Latin term for steering. It is hard to find a concrete definition for SOA Governance, as the term heavily depends on a multitude of factors.
