To find, use the matrices. The matrix multiplication is not defined. Because, the number of columns of is 3 and the number rows in is 2. So, the number of columns of is not equal to the number of rows in . Therefore, the product is not defined.

Differential Equation By

Thus the solution of the partial differential equation is $u(x,y) = f(y + \cos x)$. To verify the solution, we use the chain rule and get $u_x = -\sin x f'(y + \cos x)$ and $u_y = f'(y + \cos x)$. Thus $u_x + \sin x u_y = 0$, as desired.
