Solution 2.1: (a) The differential is exact, $u(x;u)=\arctan(x=y)$. Here one point worth discussion. The function $u(x;u) = \arctan(x=y)$ has a singularity at $x = 0; y = 0$. As a result, any close path embedding this point contributes 2π to the vari-ation of the quantity $u(x;y)$. Consequently, this function cannot serve as a thermodynamic

Statistical Physics, Second Edition develops a unified treatment of statistical mechanics and thermodynamics, which emphasises the statistical nature of the laws of thermodynamics and the atomic nature of matter. Prominence is given to the Gibbs distribution, leading to a simple treatment of quantum statistics and of chemical reactions.

The result is a manual containing solutions to some 280 problems selected from the third edition. The original idea of producing an instructor's manual first came from RKP's friend and colleague Wing-Ki Liu in the 1990's when RKP had just embarked on the task of preparing the second edition of Statistical Mechanics.

Solutions Manual For Introduction To Modern Statistical ...

Statistical physics has its origins in attempts to describe the thermal properties of matter in terms of its constituent particles, and has played a fundamental role in the development of quantum mechanics. It describes how new behavior emerges from interactions of many degrees of freedom, and as such has found applications outside physics in engineering, ...
