Solutions manual Introduction to Analysis ...

With reference to the sketch, the height is $A \cos \theta$, so the frontal area is $AB \cos \theta$. The depth is $C \sin \theta$, so the volume V is $V = (AB \cos \theta)(C \sin \theta) = (A \cos \theta)(BC \sin \theta) = A(B C) \sin \theta \cos \theta$. The same approach can be used starting with a different face. $V = C(A B) \sin \theta \cos \theta = B(C A) \sin \theta \cos \theta$. Note that $A; B; C$ are arbitrary vectors.
