The Anatomy of Revolution is a 1938 book by Crane Brinton outlining the "uniformities" of four major political revolutions: the English Revolution of the 1640s, the American, the French, and the 1917 Russian Revolution.

Brinton notes how the revolutions followed a life-cycle from the Old Order to a moderate regime to a radical regime, to Thermidorian reaction. The book has been called "classic," "famous" and a "watershed in the study of revolution", and has been influential enough to have inspire

Crane Brinton's Theory Of Revolution In his book, Anatomy of Revolution, Brinton compares revolution to a fever. In this respect, a revolution is not a positive phenomena, it is something to be avoided and cured, when and if, it occurs. This is due to the fact that "nobody wants to have a fever" (Brinton, 18).
