Visual flight rules - Wikipedia

So I asked if it was permitted to file to an airport which had approaches, but my aircraft was not equipped to fly any of them (example I don't have a GPS but the airport only has RNAV(GPS) approaches) assuming the airport was VFR and an suitable alternate that my aircraft could fly was filed. The answer was no.

Interesting Airports and Places to fly VFR

Smaller General Aviation jets and props have the choice of choosing IFR or VFR depending on weather, terrain, and airspace ahead of them. Flying into large, busy airports is almost always easier when flying IFR while getting into the airport and landing is much quicker for a VFR flight at small non-controlled airports.

Objectionable Airports on the VFR Sectional

Punching into a busy non-towered VFR airport on a sunny Saturday afternoon can be a real challenge for the IFR pilot. IFR into VMC: pilots who regularly file and fly IFR can find themselves with some very rusty VFR skills right when they might need them the most

airport - What is the best VFR route to CYKZ (Buttonville ...

Cannes (LFMD) is a fun place to fly VFR. You have the French Riviera coastline, with the Alps to the North, requiring interesting circling descents or climbs, restricted airspace around Marseille to the west that needs to be avoided, mandatory VFR routes at 1000ft AGL along the beaches.

Let's VFR Europe: VFR approach to Ljubljana Airport

I am using the Horizon Gen-X VFR photoscenery with ES trees in 4.2 along with UK2000 airports. Whilst the Orbx stuff looks 'prettier' it

just doesn't compare to actual photo scenery. I guess if you like doing VFR flying then thats the best there is, if your interest is the big jets then Orbx England/Wales/Scotland will look better and the lack ...

How To Pick The Best VFR Cross-Country Checkpoints ...

There are some amazing X Plane 11 airports to download. Global scenery are plentiful in X Plane and there is a popular choice of fantastic airports. Lets look at the best global airports within X Plane so we can give you more to think about which in just a flight you can explore all they have to offer.

Coordinates: N41°9.60' / W88°1.00' Located 02 miles NE of Bonfield, Illinois on 78 acres of land. View all Airports in Illinois. Estimated Elevation is 635 feet MSL. Magnetic Variation from 1990 is 1° West

The Freedom and Flexibility of Flying VFR | Flying

VFR Minimums in Class D Airspace - I've always had the assumption, maybe incorrectly, that in Class D airspace, once the ceiling is 1000' or above and visibility is 3 miles or greater, that the airport is operating VFR, and that's when they turn off the beacon. Under those conditions, when cleared into the Class D, do I: a.)

X Plane 11 Airports | Lets Fly VFR - Flight Simulation

U.S. Gulf Coast VFR Aeronautical Charts is designed primarily for helicopter operations in the Gulf of Mexico area. Grand Canyon VFR Aeronautical Chart covers the Grand Canyon National Park area and is designed to promote aviation safety and facilitate VFR navigation in this popular flight area.

VFR Minimums in Class D Airspace - AOPA Hangar

Keith had a student who found this "OBJECTIONABLE" symbol on the VFR sectional and wanted to know what it meant. Objectionable airports are airports that interfere with another airport's airspace.

VFR Charts - Federal Aviation Administration

UK2000's three VFR airport packs includes just about every airport in England, and mostly they blend well with the FTX England scenery (at least for Spring and Fall seasons). FTX Northern Germany is a very interesting scenery, but so far ORBX has developed only one payware airport for the region, and I am not too sure about...

*Best VFR Scenery, airport and ground (pref not too much ...
The simple answer is that Option 3 is best. Just get flight following and they will eventually hand you off to the Toronto City Center Control. These controllers direct all VFR traffic along the coast. And they are all very nice :)*

*VFR airport | Article about VFR airport by The Free Dictionary
Visual flight rules (VFR) are a set of regulations under which a pilot operates an aircraft in weather conditions generally clear enough to allow the pilot to see where the aircraft is going. Specifically, the weather must be better than basic VFR weather minima, i.e. in visual meteorological conditions (VMC), as specified in the rules of the relevant aviation authority.*
