The Boy Who Loved Math - Deborah Heiligman

As a boy in Budapest, Paul Erdos (1913–1996) had problems to solve, but they didn’t involve math. Rules were a problem, and school was another: “Paul told Mama he didn’t want to go to school anymore. Not for 1 more day, for 0 days. He wished he could take days away—negative school days!”

3 thoughts on “ Erd?s for Epsilons: “The Boy Who Loved Math” ” JSE November 20, 2015 at 2:00 am. My problem with the Heiligman-Pham book is that it presents it as normal and OK that Erdos — because he was a genius — allowed other people to take care of the menial tasks of life for him.

The Boy Who Loved Math

Math is woven into the lively writing (Mama loved Paul to infinity. Paul loved Mama to 8, too!). The wonderfully vivid artwork, where ideas from the text are clarified, also uses decorative elements to support the idea that Erdos saw the world differently—numerically.

The Boy Who Loved Math... The Improbable Life of Paul Erdos ...

What I love most about The Boy Who Loved Math was that it really wasn’t about math. It’s about the boy. Paul Erdos was something, all right. A real “character.” Typically, I’ve come to think about the mathematically centric as people who are very logically minded, people who love rules. As you learn on the second page, Erdos was ...

Review of the Day: The Boy Who Loved Math by Deborah ...

Praise for The Boy Who Loved Math “Erdos’s unconventional brilliance shines through on every page, and extensive author and illustrator notes (including Pham’s explanations of the mathematical concepts she works into each illustration) will delight readers with even a fraction of Erdos’s interest in math.”

The Boy Who Loved Math: The Improbable Life of Paul Erdos. This is an interesting story of a boy who loved math, lived his life on his own terms and devoted his life to his passion for numbers. This is a great book for boys who like math and/or numbers and for those who like to do things in their own way.

The Boy Who Loved Math - Brain Power Boy

**Description from Amazon: Most people think of mathematicians as solitary, working away in isolation. And, it’s true, many of them do. But Paul Erdos never followed the usual path. At the age of four, he could ask you when you were born and then calculate the number of seconds you had been alive in his head. But he didn’t le...
