The British Patent System during the Industrial Revolution ...

The modern French patent system was created during the Revolution in 1791. Patents were granted without examination since inventor's right was considered as a natural one. Patent costs were very high (from 500 to 1500 francs). Importation patents protected new devices coming from foreign countries. The patent law was revised in 1844 - patent cost was lowered and importation patents were abolished.

THE BRITISH PATENT SYSTEM DURING THE INDUSTRIAL REVOLUTION ...

By radically expanding the evidential base, The British Patent System during the Industrial Revolution 1700 – 1852 establishes that the availability of enforceable patent rights helped to encourage the development and diffusion of technology during the eighteenth and nineteenth centuries.

List of British innovations and discoveries - Wikipedia

Hence during the eighteenth-century the patent system emerged in something like its modern form. It provided, in theory, a monopoly position to an inventor for a period of 14 years. Moreover the level of protection afforded by patents and the costs of obtaining this protection did not alter greatly over the period.

(PDF) 'Sean Bottomley ' s The British Patent System during ...

During the1850s the British patent system was subject to major reforms. As part of the reforms, English patents granted between 1617 and 30 September 1852 were identified from the Rolls, sorted into chronological order and then numbered in a single continuous sequence. The sequence runs from GB1 of 1617 to GB14359 of September 1852.

An Economic History of Patent Institutions - EH.net

List of British innovations and discoveries. The English patent system evolved from its medieval origins into a system that recognised intellectual property; this encouraged invention and spurred on the Industrial Revolution from the late 18th century. During the 19th century, innovation in Britain led to revolutionary changes in manufacturing...
