Chemistry of Explosives (3rd Edition) Details This book has been fully revised and updated and outlines the basic principles needed to understand the mechanism of explosions by chemical explosives.

Explosives | Review | Chemistry World

Mechanical explosions occur when a closed system is heated—a violent pressure rupture can occur. However, this doesn ' t make a heated can of soup an explosive. An explosive substance is one which reacts chemically to produce heat and gas with rapid expansion of matter. A detonation is a very special type of explosion.
