A prime example of this is the Paleo diet vs the diet discussed in The China Study. The China Study promotes a plant based diet and attributes the increase of cancer, heart disease, coronary artery disease, hypertension, etc to the increasing amounts of meat/dairy in our diet.

"The China Study" Diet: What to Eat or Not to Eat

Yet, according to the China Study data, they were extremely healthy with low rates of cancer and heart disease; healthier, in fact, than many of the counties that were nearly vegan. This is just one of many cases of the selective citation and data cherry picking Campbell employs in the China Study.
