Fact Monster - A Trusted Reference Site for Kids
The epigenome is a multitude of chemical compounds that can tell the genome what to do. The human genome is the complete assembly of DNA (deoxyribonucleic acid)-about 3 billion base pairs - that makes each individual unique. DNA holds the instructions for building the proteins that carry out a variety of functions in a cell.

The Ionic Foot Detox: Fact or Myth? - Pacific College

Because medical issues are often technical issues, the average reader of the average conspiracy book is likely to take the word of the author that such and such is true. Few people, after all, have the medical training to dispute what the book says. Further, the doctors who performed the autopsy, and the Warren Commission which had to reach conclusions based on the medical evidence, blundered ...
