Grenade launcher - Wikipedia

The History of the Hand Grenade. It is used at short range, thrown by hand or launched with a grenade launcher. The resulting powerful explosion causes shockwaves and disperses high-speed fragments of the metal, which provoke shrapnel wounds. The word grenade comes from the French word for pomegranate, early grenades looked like pomegranates.

Fast Facts - History of the Hand Grenade - An Essential ...

A grenade is an explosive weapon typically thrown by hand, but can also refer to projectiles shot out of grenade launchers. Generally, a grenade consists of an explosive charge, a detonating mechanism, and firing pin inside the grenade to trigger the detonating mechanism. Once the soldier throws the grenade, the safety lever releases, the striker throws the safety lever away from the grenade body as it rotates to detonate the primer. The primer explodes and ignites the fuze. The fuze burns down
