The book focuses on the eliminators, or ways of using, each of the dependent types.

The Little Typer The Mit Press

An introduction to writing proofs about computer programs, written in an accessible question-and-answer style, complete with step-by-step examples and a simple proof assistant. The Little Prover introduces inductive proofs as a way to determine facts about computer programs. It is written in an approachable, engaging style of question-and-answer, with the characteristic humor of The Little

MIT - Massachusetts Institute of Technology

This makes for efficient and fast typing skills and many offices even require employees to have touch typing skills. Whereas people who cannot touch type write up to 35 words per minute, people who can touch type can type up to 65 words per minute. In this time saving, efficient world, it is easy to see why touch typing is so valued.

Hacks at the Massachusetts Institute of Technology are practical jokes and pranks meant to prominently demonstrate technical aptitude and cleverness, or to commemorate popular culture and historical topics. The pranks are anonymously installed at night by hackers, usually, but not exclusively, undergraduate students.The actions of hackers are governed by an informal, yet extensive, body of

The Little Typer The Mit

An introduction to dependent types, demonstrating the most beautiful aspects, one step at a time. A program's type describes its behavior. Dependent types are a first-class part of a language, and are much more powerful than other kinds of types: using just one language for types and programs allows program descriptions to be as powerful as the programs they describe. The Little Typer exp...
