Amazon.com: Customer reviews: The Making of a Tropical ...

The Making of a Tropical Disease by Randall M. Packard Summary Malaria sickens hundreds of millions of people—and kills one to three million—each year. Despite massive efforts to eradicate the disease, it remains a major public health problem in poorer tropical regions. But malaria has not always been concentrated in tropical areas.

The Making of a Tropical Disease: A Short History of Malaria. He finds that war, land development, crumbling health systems, and globalization—coupled with climate change and changes in the distribution and flow of water—create conditions in which malaria's carrier mosquitoes thrive. The combination of these forces, Packard contends, makes the tropical regions today a perfect home for the disease.
