Therefore, corresponding task-specific teaching motivation scales should correlate with global work motivation scales as teaching motivation represents a part of global work motivation. In order to test this, we included the German version of the Multidimensional Work Motivation Scale (MWMS; [25]) in our questionnaire.

The Multidimensional Work Motivation Scale

To be able to use self-determination theory in the field of organizational behaviour, the Multidimensional Work Motivation Scale was developed and tested using data from 3435 workers in seven languages and nine countries. Factorial analyses indicated that the 19-item scale has the same factor structure across the seven languages.

of the Multidimensional Work Motivation Scale (MWMS) to the Portuguese population (Gagné et al., 2015), the main objective of this research is the psychometric adaptation and validation of the scale specifically to the educational context, and the exploration of the psychometric properties of the Motivation Scale. The Self-Determination Theory

Validation Study in the Educational Context of the ...

Work motivation was measured using an abbreviated version of the Multidimensional Work Motivation Scale (Gagné et al., 2015). Because of the long questionnaire of the HEARTS study, only two items per subdimension were included. The original scale has been tested for reliability and validity in different samples (Gagné et al., 2015).

Perfectionism, in psychology, is a broad personality style characterized by a person's concern with striving for flawlessness and perfection and is accompanied by critical self-evaluations and concerns regarding others' evaluations. It is best conceptualized as a multidimensional and multilayered personality characteristic, and initially some psychologists thought that there are many positive ...

SDT suggests that an intrinsic motivation refers to activities for which the motivation promotes the behavior itself. 28 When intrinsically motivated, employees experience interest and enjoyment in the work 29 and tend to display high-quality performance. 4,30 In a meta-analysis, Nicklin suggested that intrinsic motivations are positively related to work performance, especially the quality of ...

Perfectionism (psychology) - Wikipedia

The Work Extrinsic and Intrinsic Motivation Scale (WEIMS) is an 18-item measure of work motivation theoretically grounded in self-determination theory (Deci & Ryan, 2000). The purpose of the present research was twofold. First, the applicability of the WEIMS in different work environments was evaluated. Second, its factorial structure and psychometric properties were assessed.
