The Science of Leonardo: Inside the Mind of the Great ...

Leonardo was born on April 15, 1452, in Vinci, a charming Tuscan village on the slopes of Montalbano, some twenty miles west of Florence. His father, Ser Piero da Vinci, was a young and ambitious notary, 2 his mother a peasant girl named Caterina. Leonardo was an illegitimate child, which severely limited his career options later on.

The Science of Leonardo: Inside the Mind of the Great ...

Leonardo's science is a science of qualities, of shapes and proportions, rather than absolute quantities. He preferred to depict the forms of nature in his drawings rather than describe their shapes, and he analyzed them in terms of their proportions rather than measured quantities.

Amazon.com: Customer reviews: The Science of Leonardo ...

Through his studies of living and nonliving forms, from architecture and human anatomy to the turbulence of water and the growth patterns of grasses, he pioneered the empirical, systematic approach to the observation of nature?"what is now known as the scientific method. Leonardo's scientific explorations were extraordinarily wide-ranging.
