Microsoft Soundscape - Microsoft Research

The soundscape of the world is changing. Modern man is beginning to inhabit a world with an acoustic environment radically different from any he has hitherto known. These new sounds, which differ in quality and intensity from those of the past, have alerted many researchers to the dangers of an indiscriminate and imperialistic spread of more and larger sounds into every corner of man ' s life.

What is soundscape ecology? An introduction and overview ...

The soundscape is the environment on a wavelength that is auditory rather than tactile or visible, but very much as real. Schafer's concept of the soundscape has become a hallmark of sound studies and is referenced, built upon, and criticized by writers from a wide breadth of disciplines and perspectives.
