The Statistical Probability of Falling In Love (At First ...

The Statistical Probability of Love at First Sight is a story that takes place entirely over a 24 hour period. Hadley is flying to London to attend her father's wedding and misses her original flight by 4 minutes ~ which means she meets cute British boy, Oliver, instead (and spends the rest of the night with him).

9. Exact probability test | The BMJ

In probability theory, the birthday problem or birthday paradox concerns the probability that, in a set of n randomly chosen people, some pair will have the same birthday. By the pigeonhole principle, the probability reaches 100% when the number of people reaches 367 (since there are 366 possible birthdays, excluding February 29).

possible birthdays, including February 29).However, 99.9% probability is reached with just 70 ...
