Multiverse - Wikipedia

If the Standard Model is correct, the particles and forces we observe in our universe exist as they do because of underlying quantum fields. Quantum fields can have states of differing stability,

Cosmos Neil Turok

including 'stable', 'unstable', or 'metastable' (meaning very long-lived but not completely stable). If a more stable vacuum state were able to arise, then existing particles and forces would no longer arise as they do in the universe's present state.

Action is defined mathematically as the energy multiplied by the time or the momentum times the length.

Richard Feynman used the idea of action to propose that the quantum world follows all possible histories (paths) at once with some paths more probable. He uses this idea to
