engines. For these engines, vary timing by using the Timing Check procedure. To verify that the fuel injection pump is timed correctly, first check the alignment marks on the pump flange and gear housing. NOTE: 1 mm of rotation past the timing mark will advance or retard (depending on direction of rotation) the pump timing by 1 degree.

perkins 1103 TDC and Delphi fuel injection pump removal

Perkins had relied on the P4 engine during the years after the war as the power unit for many applications from passenger cars to industrial equipment. By the end of the 1950s the engine was becoming outdated, with the indirect 'Aeroflow' combustion system becoming uncompetitive with new generations of engines from other manufacturers.
