Understanding F-Stops: How to Use F-Stops in Photography ...

Photography, like any other art, demands both compelling content and expert technique to create a pleasing result. In my previous article, I discussed some of the aesthetic choices involved in creating a successful macro image. Technique, however, is an absolute must; it's the artist's tool to convey his artistic vision.

Jeffery Luhn demonstrates how to get a fresh look at the world's favorite lighting accessory, the soft box. Some facts will confirm your assumptions, and others may surprise you, but all the information will be helpful.

How to Understand the Difference Between TTL Versus Manual ...

Many years ago, back in the days of wired telephones and film, most photographers did not give white balance (WB) or color temperature much thought. Those who did would carry around color-correction filters to screw onto the front of their lenses that would cancel out the color casts of the artificial or natural light illuminating a scene. If you were paying attention back in those ancient ...

Understanding Focus in Photography

X-Pro1 + Tosit 1.8/32 @ 32mm, ISO 200, 1/125, f/4.0 2.5) To have fun by adding different colors to images with gels. Regardless how hectic the day might turn out to be, leave yourself some room to be a little creative at each event you photograph.

Guide Number is a tool to determine exposure of Direct Flash with Manual flash power levels, to automatically deal with the Inverse Square Law, making the math be trivial

Understanding Aperture and How to Use It in Photography

The single most important element of photography is light. Simply put, without light, it is impossible to see the subject of a photograph. Therefore it stands to reason that choosing the right amount of light is one of the most critical decisions a photographer will make about a given shot. The amount of light in a photo is controlled by the camera's aperture, and the aperture is itself ...

When to Use Flash – Photography Life
