Dreams happen during the rapid eye movement (REM) stage of sleep. In a typical night, you dream for a total of two hours, broken up by the sleep cycle. Researchers do not know much about how we dream or why. They do know that newborns dream and that depriving rats of REM sleep greatly shortens their lives.

They may be the key to the right interpretation. I also found out that dreams often play with words and metaphors used in language and therefore the interpretation is partially dependent on your mother language. There are pretty universal dream symbols as well, but I wouldn't use a dream dictionary for understanding my own dreams.
