Urgos UW6/ series clock movement.

Urgos UW6/ series clock movement was mass produced in the 1950's through the 1970's. It was a popular unit for shelf clocks and wall clock applications because it was compact and ran a short pendulum. The spring driven Westminster movement runs for eight days on a single wind up.

Midwest Clock Repair

I have an Urgos GrandFather clock movement - UW66010 - it runs great but I am unable to slow it down - it gains about 10minutes a day. I have adjusted the pendulum down as far as possible. It is the original pendulum as far as I know. Is there another adjustment to slow it. The pendulum swing is a very small 2 in. swing.
