User Stories Applied

User stories are written throughout the agile project. Usually a story-writing workshop is held near the start of the agile project. Everyone on the team participates with the goal of creating a product backlog that fully describes the functionality to be added over the course of the project or a three- to six-month release cycle within it.

User Stories Applied: For Agile Software Development: Mike ...

The user story is a frequently used tool in agile software development methods such as eXtreme Programming (XP) and Scrum. It is used both for documenting the existence of a requirement and as a worm package for use in scope planning and scheduling. This is possible due to the incremental nature of agile methods.
