(SI) unit for velocity is meters per second or sm, but many other units such as hrkm, hrmi (also written as mph), and scm are commonly used.

Velocity - Wikipedia

Like speed, velocity refers to the at which an object is moving—the distance per unit of time. But velocity in physics also includes the direction in which the object is moving, whereas direction has no bearing on an object's speed. For example, if two cars were driving at a of 50 miles per hour, and both headed due north, . . .

Velocity High Speed Internet Service

Velocity Is an Important Concept in Physics. Velocity is defined as a vector measurement of the rate and direction of motion or, in simpler terms, the rate and direction of the change in the position of an object. The scalar (absolute value) magnitude of the velocity vector is the speed of the motion. In calculus terms, velocity is the first derivative of position with respect to time.
