Most conventional 'change management' programmes fail. This is mainly due to the fact that they are often based on wrong assumptions such as: .When we change the process/system, people will change their behaviour .Changes need to come from the top and filter down .Big changes need big actions .Cultural change is a painful, long-term process with no short-term results Viral

Viral Change by Leandro Herrero - Goodreads

Viral transformation is the change in growth, phenotype, or indefinite reproduction of cells caused by the introduction of inheritable material. Through this process, a virus causes harmful transformations of an in vivo cell or cell culture. The term can also be understood as DNA transfection using a viral vector.

Viral evolution is a subfield of evolutionary biology and virology that is specifically concerned with the evolution of viruses. Viruses have short generation times, and many—in particular RNA viruses—have relatively high mutation rates (on the order of one point mutation or more per genome per round of replication). This elevated mutation rate, when combined with natural selection, allows ...
