**Apple HomePod review That Apple does things
in its own sweet time is no new discovery. But
even by its own standards, the company arrived
late to the wireless speaker party. But being
late is perfectly acceptable if you're the life and
soul when you arrive - and that's pretty much
the story with the HomePod.**

Apple HomePod Review | Trusted Reviews
Apple HomePod. It's a high-quality smart speaker for your Apple Music account and iTunes library, with some Siri voice assistant features that help especially with smart home usage. The hardware is excellent, but right now, Apple doesn't have the broad vision for voice-assisted living that the Amazon Alexa and Google Assistant platforms show.

Apple notes that the HomePod separates out direct and ambient energy in music (think: applause and surround). It fires ambient audio towards walls while more directly focusing primary audio forward.

Apple HomePod review: Great sound, but it's trapped in ...

Apple's HomePod is the best-sounding wireless smart speaker available, and you can control it by voice using Apple's virtual assistant, Siri. But the HomePod is worth considering only if you're an iPhone owner and a subscriber to Apple Music (or are willing to be)—don't buy it

Apple HomePod Review & Rating | PCMag.com

The HomePod is a bass monster, for better or worse. On Red or Dead the double bass sounds like it has a single string and is being played in a small closet. Thumps and booms are pretty much what the HomePod is all about and it's very clear after a single listen to a track with very controlled bass.
