Windows 7 Device Driver | InformIT

Install device drivers for Windows 7. Most of these drivers are installed automatically by Windows 7 but if this is not the case drivers need to be installed by the user. Opening the Device Manager (available in the Control Panel) will tell the user which hardware drivers need to be installed by marking them with a yellow exclamation mark.

## Windows 7 Device Driver (??)

If you're writing a driver to support a hardware device on Windows, you'll need the hardware specifications for the device you'll be supporting. The information you need usually takes the form of a "data sheet" (which is often more like a book than a single sheet of paper) that describes the register-level interface your device.
